

About Us

Empowering personal injury firms with expert Virtual Case Managers who move your cases faster and increase cash flow.

Virtual Case Managers (VCM) is a specialized legal staffing solution built exclusively for personal injury law firms.

We provide fully remote, full-time virtual case managers who help move cases through your firm faster. A VCM handles day-to-day case management tasks so attorneys can focus on strategy, client advocacy, and growth.

We serve personal injury attorneys and firms that want to maximize their time, increase case velocity, and improve cash flow without adding internal overhead or operational strain.

Our virtual case managers are **degreed professionals from Latin America and South Africa, fully dedicated to your firm and working 40 hours per week aligned with your time zone.** Each case manager completes an extensive training program developed by prominent personal injury attorney **Ryan McKeen**, giving them a deep, practical understanding of PI workflows, client communication, and what it truly means to be an effective case manager. This combination of specialized training, full-time dedication, and proven systems allows cases to move faster, clients to receive better service, and firms to scale with confidence.

Virtual Case Managers
Powered by Get Staffed Up
sets itself apart from other
VCM providers because **we
prioritize quality over speed
to market.**

Training We Provide

Ryan McKeen

“If I split my career into two decades...My first 10 years were really me learning how to become the best lawyer possible. My second 10 years were learning how to become the best business owner possible. I wanted to get involved with Virtual Case Managers because at this point in my career I want to focus on building products that I wish I had when I was in a law firm.”

– **Ryan McKeen**, personal injury attorney, business owner, and all-around great guy.
